PROFESSIONAL SUMMARY — TAILORED FOR CLOUDSCALE TECHNOLOGIES

Senior QA Automation Engineer with 5+ years of practical experience building fast, reliable test suites using Playwright, Selenium, Cypress, Appium, PyTest. I focus on keeping CI/CD pipelines green, cutting regression time from hours to minutes, and working directly with developers at CloudScale Technologies to ship clean releases. Available to start 1 week after offer.

TECHNICAL SKILLS MATRIX

Playwright • Selenium • Cypress • Appium • PyTest • JUnit • Python • TypeScript • Java • SQL • Bash • Postman • REST Assured • REST API • k6 • JMeter • GitHub Actions • GitLab CI • Docker • Kubernetes

WORK EXPERIENCE

Full-Stack QA Trainee (Lab Program) | Organization (May 2026 – September 2026)

- • Analyzed product specifications and user stories to construct structured test plans, execution checklists, and test cases for enterprise web applications.
- • Conducted functional, regression, smoke, and exploratory testing across responsive platforms (including a Policy Management System), validating user input constraints and calculation accuracy.
- • Tested REST API endpoints in Postman, verifying request parameters, authentication tokens, JSON response schemas, and HTTP status codes.
- • Formulated multi-table SQL queries in PostgreSQL to audit backend relational data consistency, identifying transactional discrepancies and verifying data persistence.

Junior Software Testing Engineer | Organization (January 2025 – June 2025)

- • Participated in two-week Agile sprint cycles, decomposing business requirements into comprehensive test scenarios and executing functional, regression, and API test suites.
- • Developed and maintained automated test scripts for web applications and backend APIs, reducing manual regression overhead and improving UAT turnaround.
- • Designed automation strategies utilizing the VIVIDUS test automation framework and integrated test cases into continuous integration (CI/CD) pipelines.
- • Performed REST API verification in Postman, evaluating payload structures, response headers, and business logic calculations.

Quality Assurance Engineer Intern | Organization (August 2024 – January 2025)

- • Analyzed technical requirements and user stories to define testing scope, authoring modular Test Plans, Test Cases, and execution Checklists.
- • Performed smoke, regression, and cross-browser functional testing across desktop browsers and mobile responsive viewports.
- • Executed API testing via Postman using chained requests, environment variables, and schema validation.
- • Ran SQL queries against PostgreSQL databases to verify backend data persistence and table integrity.

Software QA Intern (Financial Systems) | Organization (September 2023 – January 2024)

- • Analyzed financial and trading software specifications to design and execute manual test cases in accordance with STLC best practices.
- • Validated mathematical calculation rules, boundary limits, and financial transaction workflows against formal benchmark specifications.
- • Developed Python automation scripts to parse, process, and verify structured financial test data against expected outputs.

- Managed issue lifecycles and defect documentation in Jira, integrating validation scripts into GitLab CI pipelines.

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science — Technical University of Munich (2019)
